Affiliate Income from various sources – very difficult to track. I promote everything from Amazon to Info Products from different programs and haven't set up individual tracking links/accounts. I am not including my own product (Mom's Talk Biz) sales in this and am keeping my estimate very conservative.

Lowball Average: \$150/mo

Total Lowball Average: \$700 (x 12 = \$8400.00)

The network is offered as a whole. I will not sell sites individually. I am seeking a cash offer that starts at an amount equal to a year's income. Payment expected in full before sites and lists are transferred.
